## Countermeasures to Prevent the Expansion of the Novel Coronavirus Infection

We would like to express our heartfelt sympathy to those affected by the novel coronavirus and to those living in areas affected by the spread of infection.

Even after the decision made by Japanese Government to lift the emergency declaration, we are continuing our efforts to prevent and expand the spread of infections of COVID-19 by encouraging employees to wash their hands, wearing masks, working at different times, and working from home. Because the infection of COVID-19 has not yet been completely settle.

We will continue to actively utilize web conferences, TV conferences, and other media to reduce the risk of infectious diseases for customers, other stakeholders, and employees.

With regard to overseas travel, there are still many countries/regions where the Ministry of Foreign Affairs of Japan recommends the suspension of travel based on the infectious diseases threat. Therefore, we are unable to sufficiently respond to requests for the dispatch of our staffs from overseas customers, and as a result, we have inconvenienced our overseas customers. However, regarding the dispatch of our staff, we would like to make decisions from the viewpoint of safety for each case.

We would like to thank all those involved for their understanding.

Best Regards,
