

Received an order for equipment for the North Field East (NFE) project in Qatar

Shin Nippon Machinery Co., Ltd. has received an order for Boiler Feed Water Pumps and Steam Turbines for the North Field East (NFE) project in Qatar from CTJV, the joint venture between Chiyoda Corporation and Technip Energies. The NFE Project, owned by Qatar Energy, will increase the State of Qatar's LNG production capacity from 77 million tons per annum (MTPA) to 110 MTPA.

Shin Nippon Machinery Co., Ltd. will deliver 9 boiler feed water pumps and 6 steam turbine drivers for this project. These are API 610 / API 612 compliant equipment similar to those that have been delivered previously to oil and gas plants around the world. Our extensive experience and proven track records were highly valued for this order. We have delivered a large number of steam turbines (delivery record: 85 countries / 7,500 units) and process pumps (delivery record: 62 countries / 27,000 units) all over the world.
