

## Received order for equipment for Thailand's first Sustainable Aviation Fuel (SAF) production plant

Shin Nippon Machinery Co., Ltd. has received an order for 12 units (22 pumps and 1 steam turbine to drive pumps) for Thailand's first Sustainable Aviation Fuel (SAF) production plant, focusing on hydrogenating of the used cooking oil.

This SAF plant belongs to BSGF Company Limited—a joint venture of Bangchak Corporation Public Company Limited, BBGI Public Company Limited, and Thanachok Vegetable Oil (2012) Company Limited, with TTCL Public Company Limited serving as the contractor—marking a significant advancement in Thailand's efforts towards sustainable aviation solutions.
