SHIN NIPPON MACHINERY CO., LTD.

**Order Received and Handover Completed for Steam Turbine Replacement Project at a Pulp and Paper Mill in the Kingdom of Thailand**

Shin Nippon Machinery Co., Ltd. has received an order for and completed the handover of a replacement project involving one 26 MW Steam Turbine Generator set for a major pulp and paper mill located in Kanchanaburi Province, Thailand.

This project involved replacing an aging Steam Turbine system manufactured by another company. The existing foundation of the previous unit was reused, while the Steam Turbine and Generator were replaced with our company's equipment. We were responsible for supplying the Steam Turbine, Generator, and Technical Advisors (TA) for installation and commissioning supervision.

Through the delivery of our equipment for this project, we will contribute to the stable supply of electricity and reliable operation of the facility, thereby supporting the continued development of the mill and the surrounding region.
